What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Randolph is 4 of 18 by share (highest = 1), not a district performance ranking. 9 private schools are listed in the county's January 2026 directory. [2, 5]

Randolph County includes Asheboro City Schools and Randolph County Schools. County homeschool totals cannot be assigned solely to Asheboro City. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 9 private schools in Randolph County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 19 private schools in Cabarrus County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Orange is 16 of 18 by share (highest = 1), not a district performance ranking. 8 private schools are listed in the county's January 2026 directory. [2, 5]

Orange County is served by Chapel Hill-Carrboro City Schools and Orange County Schools. Both member views use the same county homeschool totals. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Mecklenburg is 14 of 18 by share (highest = 1), not a district performance ranking. 112 private schools are listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 112 private schools in Mecklenburg County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

2022-23	809	$4,612,325
2023-24	1,009	$6,217,323
2024-25	2,061	$11,604,705

Final NCSEAA payments for residents, including those attending private schools outside the county. Excludes ESA+. Recipients may already have attended private schools; these amounts do not identify district budget losses. [4]

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Durham is 18 of 18 by share (highest = 1), not a district performance ranking. 45 private schools are listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 45 private schools in Durham County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Statewide program context

Statewide disbursements were $134.6M in 2022-23, $185.6M in 2023-24, $432.2M in 2024-25. The program figures exclude ESA+.

Scholarship recipients overlap private-school enrollment and may already have attended private schools. These figures do not identify prior public-school attendance, district withdrawals, all private-school revenue, or money removed from a district budget. County school-location counts are a separate geographic measure.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Final NCSEAA payments for residents, including those attending private schools outside the county. Excludes ESA+. Recipients may already have attended private schools; these amounts do not identify district budget losses. [4]

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Pasquotank is 9 of 18 by share (highest = 1), not a district performance ranking. 8 private schools are listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 8 private schools in Pasquotank County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Hertford is 13 of 18 by share (highest = 1), not a district performance ranking. 4 private schools are listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 4 private schools in Hertford County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Orange is 16 of 18 by share (highest = 1), not a district performance ranking. 8 private schools are listed in the county's January 2026 directory. [2, 5]

Orange County is served by Chapel Hill-Carrboro City Schools and Orange County Schools. Both member views use the same county homeschool totals. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 8 private schools in Orange County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

Final NCSEAA payments for residents, including those attending private schools outside the county. Excludes ESA+. Recipients may already have attended private schools; these amounts do not identify district budget losses. [4]

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Rockingham is 2 of 18 by share (highest = 1), not a district performance ranking. 13 private schools are listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 8 private schools in Sampson County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

Statewide program context

Statewide disbursements were $134.6M in 2022-23, $185.6M in 2023-24, $432.2M in 2024-25. The program figures exclude ESA+.

Scholarship recipients overlap private-school enrollment and may already have attended private schools. These figures do not identify prior public-school attendance, district withdrawals, all private-school revenue, or money removed from a district budget. County school-location counts are a separate geographic measure.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

2023-24	111	$638,603
2024-25	235	$1,373,935

Final NCSEAA payments for residents, including those attending private schools outside the county. Excludes ESA+. Recipients may already have attended private schools; these amounts do not identify district budget losses. [4]

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Vance is 12 of 18 by share (highest = 1), not a district performance ranking. 6 private schools are listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 6 private schools in Vance County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.

Population context and boundaries

Each district's pages pair membership with its county's July 2022-2024 residents ages 5-17, using Census Vintage 2025. Population is not an enrollment sector; district and county age/geographic coverage differ. Dividing the district count by county population would not yield valid district market share. Edgecombe's 2024-25 boundary transition limits constant-boundary comparisons.

Network and geography

Across TIP's 18 county markets, 2024-25 homeschool shares range from 3.5% to 14.6%. Warren is 5 of 18 by share (highest = 1), not a district performance ranking. 1 private school is listed in the county's January 2026 directory. [2, 5]

County-level enrollment provides broad context for this district. Cross-county attendance and differences in sector definitions limit precise resident market-share comparisons. Homeschool estimates may be affected by registry cleanup; changes do not establish transfers to or from district schools. [3]

Reading the county market

DNPE estimates students separately from registered home schools. The January 2026 directory lists 1 private school in Warren County; this directory snapshot is separate from the annual enrollment series. Scholarship funding follows student residence, including attendance outside the county. Neither measure identifies district budget losses. [3-5]

What the changes mean

Every share uses the same-year county total across all four sectors. A sector can gain students while losing share if other sectors grow faster. County-associated enrollment counts can include cross-county attendance; these are administrative market indicators, not a census of where resident children attend school.

County figures cover multiple districts where applicable. Randolph County cannot isolate Asheboro City residents; Davidson cannot isolate Lexington or Thomasville. Edgecombe's boundary transition limits comparisons. Share changes do not identify student transfers or explain why a change occurred. Rounded displayed shares and changes may not sum exactly.

Core comparisons end in 2024-25. A matching 2025-26 four-sector county denominator has not been verified. Newer counts are excluded from this report.
